(j) Two examples of civil case:

- (i) disputes between land-lord and tenant
- (ii) Marriages
- (iii) Constitutional Remedies

(iv) Property disputes etc.

(2) Extensive Agriculture

(i) Yield

(a) Extensive Agriculture has a low yield per hectare

(b) One or two crops are usually grown by the farmers. Ex:- corn, wheat, pulses.

(ii) Market

(a) This type of agriculture is done on large scale for selling in the global markets.

Intensive Agriculture

(i) Yield

(a) Intensive Agriculture has a ~~large~~ high yield per hectare.

(b) More than one crop is grown by the farmers due to the fertile soil and a lengthy growing period. Ex:- wheat, rice, pulses.

Market

(a) This type of agriculture is ^{also} done on a large scale but for selling in the local and national markets.

(b) Has proper storage facilities due to international trade and market.

(b) Storage facilities vary in such agriculture depending on the local, ^{market} and national traders.

Mechanization

(a) The cost of labour is less as most of the work is done by machines and other agriculture implements.

(a) The cost of labour is more as the dependency on the machines is not like that in the extensive agriculture.

(3) 'The lithosphere consists of loose surface material called soil.' The soil mainly consists of two components:-

- (a) The organic component
- (b) The inorganic component

(a) The organic component consist of the dead and decaying parts of plants and animals, called as Humus.

(5)

It helps in enriching the fertility of the soil.

(b) (ii) The inorganic component of the soil consists mainly of the minerals, ^{and nutrients} present in it ~~and~~, water and air that occupy some spaces in the soil.

(4) Generation of Hydroelectricity

- (a) Hydroelectricity is generated in the Dams.
- (b) The water is let to fall from a height.
- (c) In a dam the water is stored in the pipes and the running water ~~turns~~ ^{moves} the blades located at the bottom of the pipe.
- (d) These blades when moved turn on the electrical generator and hence, this is how hydroelectricity is formed.

(5) Conservation of Resource and Energy Crisis.

Energy crisis is defined as the exhausting of the conventional sources of energy which is

caused due to the following factors:-

- (i) The exhaustible sources of energy such as coal, petroleum, natural gas etc take a large amount of time to get renewed i.e millions of years.
- (ii) Due to the population explosion in the recent years the dependency and rampant exploitation of these resources have increased.
- (iii) These resources are unevenly distributed on the earth's surface and the utilization of these resources is more than their production.

(3)

Shri Nayanar Guru

- (i) He was a famous Hindu Saint and a social reformer.
- (ii) He was born in the Ezhava Community of Kerala.
- (iii) He opposed Brahmin Dominance, Caste System, untouchability and child marriage which were prevalent in the society.
