**TIME-45 Min**                                                            **MAX.MARKS:20**

**Choose the correct option:**                                          **(2×1=2)**
1. If Divisor = 5, Remainder = 3, Quotient =9 then Dividend =_____?

   a. 17                b. 48                c. 45                d. 32

2. 5 lakh× _____ = 50lakh

   a. 0        b. 10          c. 1          d. 100

**Fill in the blanks:**                                                  **(2×1=2)**

3. 10 ×_____= 9,000

4. 7,612×_____ =40×7612

**Answer the following question:**                                      **(2×1=2)**

5. Divide 118 by 6 and write the quotient.
6. Divide 0 by 8 and write the quotient.

**Short Answer Type Question – I**                                       **(2×2=4)**

7. Divide 2,142by8 and write the quotient and the remainder.
8. The cost of five pens of the same type is Rs.75. Find the cost of one pen.

**Short Answer Type Question – II**                                      **(2×3=6)**

9.  A 75m ribbon is cut in to 15 pieces of same length. What is the length of each
    piece?
10. Given that 270× 15 = 4,050.Find the product 270×16.

**Long answer type question:**                                          **(1×4=4)**

11. Divide &check your answer:
      9885 by 46
