## PERIMETER AND AREA

## WORKSHEET (BASIC)

STD-6

## 1 mark questions

1. Find the perimeter of the square whose side is 2.5 cm .
2. What will be the perimeter of a rectangle whose length is 2 m and breadth is 1.5 m ?
3. Two squares of side 4 cm each are joined together to make a new figure. What is the figure called?
4. Two square stamps of side 1.5 cm are joined together. Find the area required to paste these two stamps ?
5. Four equilateral triangles of side 4.5 cm are joined together to make a figure. Find the perimeter of the new figure ?

## 2marks questions

6. Length of a rectangular field is 12 m and breadth is 8 m . Find the perimeter of the rectangular field.
7. A man is running around a square field of side 13.5 m . How much distance does he cover?
8. A piece of string is 80 cm . What will be the length of each side if the string is used to form a square?
9. The area of a rectangular garden 50 m long is 300 sq . m.. Find the width of the garden?
10. The area of a rectangular garden is 2900 sq.m.If its breadth is 29 m , find the length of the garden ?
11. If the area of a square is $64 \mathrm{sq} . \mathrm{cm}$., then find the length of each side .
12. Find the perimeter of an equilateral triangle of side 9 cm .
13. Find the perimeter of a triangle of sides $3 \mathrm{~cm}, 4 \mathrm{~cm}$ and 5 cm .
14. Find the perimeter of an isosceles triangle whose equal sides are 8 cm each and third side is of 6 cm .
15. Two sides of a triangle are 12 cm and 14 cm . If the perimeter of the triangle is 36 cm , find the third side .

## 3marks questions

16. Cost of fencing a square field is Rs 1200 .If the cost of fencing per metre is Rs 30 , find the area of the square field.
17. Which play ground has bigger area? One that measures 50 m by 40 m and another that measures 75 m by 20 m .
18. Find the cost of fencing a rectangular park of length 175 m and breadth 50 m at the rate of Rs 15 per metre.
19. What is the length of the wooden strip required to frame a photograph of length and breadth 32 cm and 22 cm ?
20. The cost of fencing a square field at Rs 35 per metre is Rs 4480 . Find the length of each side of the field.
21. If the perimeter of a rectangle is 100 cm and its length is 32 m , then find the length of the rectangle.
22. If the length of a rectangle is doubled keeping the breadth same, then what will happen to the area?
23. What is the perimeter of the square whose area is 225 sq cm ?
24. Length of a rectangular field is 220 m and width is 130 m . If a man runs around this field 3times, find the distance covered by him?
25. Rahul walks around a square park once and covers 800 m . What will be the area of the park ?
26. The area of a rectangular field is 1600 sqm . If the length of the field is 80 m , find the perimeter of the field?

## 4 marks questions

27. The length of a rectangular field is thrice its breadth. If the perimeter of this field is 800 m , find the length of the field.
28. Gita runs 10 times around a square field of side 55 m and Sita runs 5 times around a rectangular field of length 45 m and breadth 35 m . Who covers more distance and by how much ?
29. Ram wants to cover the floor of her bedroom whose length is 5 m by 4 m by square tiles. If each square tile is of side is 20 cm , then find the number of tiles required to cover the floor ?
30. Perimeter of a square and a rectangle is same.If a side of the square is 15 cm and one side of the rectangle is 18 cm , find the area of the rectangle.

## PERIMETER AND AREA <br> STD-6 <br> WORKSHEET (STANDARD)

## One mark questions :

Q1.If the perimeter of a square is 16 m , then its area is $\qquad$ cm.

Q2. The area of a rectangle is 20 square cm .If the breadth is 6 cm , then its length is $\qquad$ .

Q3.If the ratio between length and perimeter of a rectangular plot is $1: 3$, then the ratio between the length and breadth of the plot is $\qquad$ .

Q4. What will happen to the area of a square if its side is tripled?
Q5. If length of diagonal of a square is 20 cm , then its perimeter is $\qquad$ .

Q6. If length and breadth of rectangle are doubled then its area will be $\qquad$ .

Q7.If each side of a square is halved then its area will be $\qquad$ .

Q8. Arectangular carpet has area 120 square metres and perimeter 46 metres. The length of its diagonal is $\qquad$ .

## Two marks questions :

Q9. The side of a rectangle are in the ratio 5:4 .If its perimeteris 72 cm Find its length in metre.

Q10. The cost of putting a Fence around a square field at Rs. 3.50 per meter is Rs. 450. Find the length of each side of the field .

Q11. If diagonal of a rectangle is thrice its smaller side, then find the ratio of its length and breadth .

Q12. If the ratio of areas of two squares is $225: 256$, thenfind the ratio of their perimeters.

## Three marks questions :

Q13. If diagonal of one square is double the diagonal of another square, then find the ratio of their areas .

Q14. Find the area of a rectangle field in hectares whose sides are 75 m 5 dm and 120 m .

Q15. How many envelopes can be made out of a sheet of paper 125 cm by 85 cm supposing one envelope require a piece of paper of side 17 cm by 5 cm .

Q16. The carpet for a room 6.6 m by 5.6 m cost Rs. 3960 and it was made from a roll 70 cm wide. Find the cost of the carpet per metre.

## Four marks questions :

Q17. A rectangular field measured 290 m by 210 m . How long will it take for a girl to go two times round the field, if she walks at the rate of $1.5 \mathrm{~m} / \mathrm{s}$ ?

Q18. A wire is in the shape of a rectangle whose length is 40 cm and breadth is 22 cm .If same wire is bent in the shape of square, what will be the measure of each side ? Also find which shape encloses more area.

Q19. A room is 9 m long, 8 m broad and 6.5 m high. It has one door of dimension $2 \mathrm{~m} \times 1.5 \mathrm{~m}$ and three windows each of dimension $150 \mathrm{~cm} \times 110 \mathrm{~cm}$. Find the cost of white washing the walls at Rs. 3.80 per square metre.

Q20. The perimeter of a rectangle is 36 cm . What will be length and breadth (In natural numbers ) of that rectangle whose area is
I) Maximum. II) minimum .

## PERIMETER AND AREA <br> STD-6 <br> WORKSHEET (ADVANCE)

## One mark questions :

1. If length and breadth of arectangular is halved then its area will be
$\qquad$ .
2. A wire of length 84 m is converted into a square then broken to form a rectangle of length 30 m . Find the breadth of rectangle.
3. Theratio of lengths of two rectangular fields is $4: 3$ and the ratio of their breadths is $3: 2$. Find the ratio of their areas.
4. The area of a square is $3 / 4$ times area of a rectangle and the breadth of the rectangle is $1 / 4$ of its length. Find the area of the square if the sum of length and breadth of the rectangle is 15 m .

## Two marks questions :

5. The length of the diagonal of a square is 50 . Find the perimeter of a square .
6. A rectangle field is 48 m long and 20 m wide. How many triangular flower beds whose sides containing right angle measure 12 m and 5 m can be laid on this field?
7. The measurements in this given figure are in the cm . What is its area ?

8. If the perimeter of a square increased by $25 \%$ then What is the increase in its area?

## Three marks question

9. Find the cost of the flooring the verandah at the rate of Rs. 12 per square metre if the length and breadth of verandah are in the ratio $3: 2$ and its perimeter is 40 m .

## Four marks questions

10. A nursery school playground is 160 m long80m wide. In it $80 \mathrm{~m} \times 80 \mathrm{~m}$ is kept for swings and in the remaining portion ,there are 1.5 m wide path parallel to its width and parallel to its remaining length shown in the figure. The remaining area is covered by grass .Find the area covered by grass.
