7. The sum of a two digit number and the number formed by reversing its digits is 110 . If 10 is subtracted from the number, the new number is 4 more than 5 times the sum of the digits in the original number. Find the number.
[CBSE 2017]
8. Susan invested certain amount of money in two schemes A and B, which offer interest at the rate of $8 \%$ per annum and $9 \%$ per annum, respectively. She received ₹ 1860 as annual interest. However, had she interchanged the amount of investments in the two schemes, she would have received ₹ 20 more as annual interest. How much money did she invest in each scheme?
[HOTS]
9. X takes 3 hours more than Y to walk 30 km . But, if X doubles his speed, he is ahead of Y by 1.5 hours. Find their speed of walking.
[HOTS]
10. In a function if 10 guests are sent from room $A$ to $B$, the number of guests in room $A$ and $B$ are same. If 20 guests are sent from $B$ to $A$, the number of guests in $A$ is double the number of guests in $B$. Find number of guests in both the rooms in the beginning.
11. A vessel contains a mixture of 24 litres milk and 6 litres water and second vessel contains a mixture of 15 litres milk and 10 litres water. How much mixture of milk and water should be taken from the first and the second vessel separately and kept in a third vessel so that the third vessel may contain a mixture of 25 litres milk and 10 litres water.
12. A shopkeeper sells a shirt at $8 \%$ profit and a sweater at $10 \%$ discount, thereby, getting a sum $₹ 1008$. If she had sold the shirt at $10 \%$ profit and the sweater at $8 \%$ discount, she would have got ₹ 1028 . Find the cost price of the shirt and the list price (price before discount) of the sweater.
13. Solve graphically:

$$
\begin{aligned}
& 2 x+y=6 \\
& 2 x-y+2=0
\end{aligned}
$$

14. Draw the graphs of the following equations:

$$
2 \mathrm{x}+\mathrm{y}=2 ; 2 \mathrm{x}+\mathrm{y}=6
$$

Find the coordinates of the trapezium formed by these lines. Also find its area.
15. Draw the graphs of the equations: $-x+3 y=6 ; 2 x-3 y=12$ and hence find a if $3 x+2 y=3+a$. Find the area of the triangle formed by these lines with Y -axis.
16. Show graphically that the pair of linear equations
[CBSE 2014]

& 2 x-2 y-2=0 \\
& 4 x-4 y-10=0 \text { is inconsistent. }
\end{aligned}
$$

17. A and $B$ are friends and their ages differ by 2 years. A's father $D$ is twice as old as $A$ and $B$ is twice as old as his sister C . The age of D and C differ by 40 years. Find the ages of A and B .
18. A boat covers 32 km upstream and 36km downstream in 7 hours. Also, it covers 40 km upstream and 48 km downstream in 9 hours. Find the speed of the boat in still water and that of the stream. [CBSE 2010, 2012]
